Project Name	ComicCrafter AI – AI-Powered Comic Strip Generator
Maximum Marks	2 Marks

Project Pitch

ComicCrafter AI is an AI-powered comic generation application that converts a short story prompt into a six-panel illustrated comic. Gemini creates structured scenes and dialogue, ClipDrop generates the artwork, Pillow assembles the 3×2 strip, and ReportLab provides a downloadable PDF.

60-Second Explanation

- 1 The user enters a short story scenario and selects an art style.
- 2 Gemini 1.5 Flash divides the scenario into exactly six panel descriptions and dialogue.
- 3 ClipDrop generates one image for each panel using the selected visual style.
- 4 Pillow adds dialogue below each panel and combines the six panels into a 3×2 strip.
- 5 The application previews the comic and creates an A4 PDF for download.

Speaker Allocation

Member	Speaking Responsibility
Anwin Shellman J	Problem, Streamlit interface, application flow and integration.
Sivasankar C	Gemini prompt, six-panel generation and dialogue parsing.
Sivasankaran M	ClipDrop image generation, style mapping and comic assembly.
Nishanth S	PDF output, testing, setup, limitations and future scope.
