

Problem-Solution Fit

Date 03 October 2026
Team ID COMICCRAFT-TEAM
Project Name ComicCrafter AI – AI-Powered Comic Strip Generator
Maximum Marks 3 Marks

Problem-Solution Mapping

User / Creator Problem	ComicCrafter AI Solution	Expected Value
Manual story-to-panel planning	Gemini splits the scenario into exactly six structured panels.	Faster storyboarding.
Manual drawing or searching for artwork	ClipDrop generates an image from each panel description.	Lower visual-production effort.
Different visual styles require different tools	Four predefined art-style mappings are available.	Simple creative customization.
Dialogue placement and panel arrangement are repetitive	Pillow wraps dialogue below each image and builds a 3×2 grid.	Consistent final layout.
Preparing a shareable document takes extra work	ReportLab converts the final strip into an A4 PDF.	Ready-to-download output.

Fit Assessment

ComicCrafter AI directly connects the identified creator problem to implemented features: story prompt → six-panel structure → AI artwork → dialogue overlay → 3×2 comic → PDF export.

Team Contribution

Member	Primary Contribution
Anwin Shellman J	Requirements, problem analysis, Streamlit UI and application integration
Sivasankar C	Gemini prompt engineering, six-panel generation and dialogue parsing
Sivasankaran M	ClipDrop image generation, image processing and 3×2 comic assembly
Nishanth S	PDF export, testing, deployment setup, documentation and quality assurance
