

Project Executable Files

Date 03 October 2026
Team ID COMICCRAFT-TEAM
Project Name ComicCrafter AI – AI-Powered Comic Strip Generator
Maximum Marks 3 Marks

Step 1: Submission Checklist

S.No	Item to Submit	Status
1	Complete source code	Yes – app.py and BACKEND modules
2	README / setup guide	Yes – README.md
3	requirements.txt	Yes
4	Environment configuration	Required – GEMINI_API_KEY and CLIPDROP_API_KEY
5	Generated output	Created locally under OUTPUT/
6	Panel images	Created locally under PANEL_IMAGES/
7	Mobile/Desktop executable	NA – Streamlit web application
8	Test evidence	Can be produced from the test cases in Performance Testing
9	Deployment URL	NA – supplied project is intended for local execution
10	GitHub link	Not specified in the supplied code package

Step 2: File / Folder Structure

Comic_Craft-main/
├── app.py ├── BACKEND/ | ├── generate_panels.py | ├── generate_image.py | ├── main.py | ├── process_comic.py ├──
PANEL_IMAGES/ ├── OUTPUT/ ├── README.md └── requirements.txt

Step 3: Run Instructions

- 1 Install Python and create a virtual environment.
- 2 Run pip install -r requirements.txt.
- 3 Create a .env file with GEMINI_API_KEY and CLIPDROP_API_KEY.
- 4 Run streamlit run app.py.
- 5 Enter a story prompt, choose a style and select Generate Comic.
- 6 Review the generated strip and download the PDF.

Team Ownership

Member	Ownership
Anwin Shellman J	Requirements, problem analysis, Streamlit UI and application integration
Sivasankar C	Gemini prompt engineering, six-panel generation and dialogue parsing
Sivasankaran M	ClipDrop image generation, image processing and 3×2 comic assembly
Nishanth S	PDF export, testing, deployment setup, documentation and quality assurance
