

Empathy Map

Date 03 October 2026
Team ID COMICCRAFT-TEAM
Project Name ComicCrafter AI – AI-Powered Comic Strip Generator
Maximum Marks 2 Marks

Target User: Person Creating a Short Comic from a Story Idea

Area	Observations
Says	“I have a story idea but need a quick way to turn it into a comic.” “I want to choose the visual style.”
Thinks	“Will the six panels follow my story?” “Will the dialogue match the generated scenes?”
Does	Enters a story prompt, selects Manga, Anime, American or Belgian style, generates the comic and downloads the result.
Feels	Excited when the panels are coherent; frustrated when generation fails or produces incomplete panels.
Pains	Manual panel planning, drawing effort, lettering, image generation and arranging multiple panels.
Gains	Fast story-to-comic conversion, style choice, automatic dialogue placement, 3×2 output and PDF export.

Design Implication

ComicCrafter AI should keep input simple, enforce a six-panel structure, separate text generation from image generation, provide clear error messages and make the final comic easy to save.
